

Gill designs, develops and manufactures innovative, inherently robust sensing and measuring products and equipment for the world's harshest environments.

We protect our environment through our actions and our products. We are committed to complying with all applicable environmental laws and regulations, as well as to continually improving our environmental performance by setting and working towards realistic objectives.

To achieve our objectives, we will:

- **Minimise our environmental impact by...**
 - reducing our energy usage and generating less waste.
 - continually evaluating our processes to identify areas where we can improve and implement changes that reduce our environmental impact.
- **Ensure we comply with environmental laws and regulations by...**
 - understanding our own aspects and impacts and making sure we are in compliance with all laws and regulations.
- **Promote environmental awareness by...**
 - adopting environmentally responsible practices across all our sites, and where possible we will encourage our supply chain to reduce their environmental impact.
 - implementing environmentally responsible practices throughout our businesses
- **Continually improve our environmental performance by...**
 - setting and monitoring environmental objectives and targets and reviewing our performance regularly.

Our commitment to reducing our impact on the environment will be reflected in everything we do, from the design and development of our products to our manufacturing efficiency and delivery to our customers.
